INFORMATION SOLUTIONS

IT Solutions for the 21st Century

Smart. Efficient. Thorough. Knowledgeable.

These are some of the adjectives clients use to describe engagements with Techgardens. Your infrastructure is the backbone of your business and at Techgardens we are committed to delivering perfection, on time, the first time, and every time.

Overview

- Founded in 2009
- Headquartered in NYC
- Clients throughout North America
- Industries: Financial, Healthcare, Education, Government, Service Providers, Manufacturing, Energy and Retail

Techgardens has focused teams of domain experts in enterprise storage, network infrastructure, security and cloud services. We are a trusted IT partner for businesses across North America that rely on us for their IT consulting and implementation needs. Headquartered in NYC for more than 10 years, Techgardens has amassed unrivaled experience in analyzing, defining and implementing the right IT solutions for our clients.

Selecting complex and rapidly evolving technology requires the expertise that Techgardens has acquired through experience. At Techgardens, we apply state-of-the-

art knowledge of network security, enterprise storage, communications infrastructure and cloud services to help your IT professionals reach their goals. Unlike larger IT consultants, our unique small team, multi-disciplinary approach means we are nimble and responsive to your needs.

Whether you require upgrades to your existing system or must create entirely new structures, Techgardens offers life-cycle-based solutions that will match your performance and budget requirements. We invite you to discover how we can solve your IT challenges.

Design and Engineering

Successful IT projects require careful analysis of goals and objectives. These include the technical, operational and budgetary requirements of the organization. Techgardens technical knowledge and experience in finance, government, energy, healthcare, manufacturing, retail and other verticals ensures that you get the insight you need to make the right decisions. We offer specific recommendations and can implement programs based on your needs and our deep understanding of technology.

Implementation and Integration

Executing new technology initiatives while maintaining your current operations presents unique challenges that we've encountered hundreds of times. Our experience helps you avoid the common pitfalls that arise when integrating and inter-operating new technology. The hallmarks of Techgardens implementation programs are smooth, rapid, and predictable execution of plans and milestones. We know the problems that can arise, so your people don't have to learn on the job.

From tactical engagements to turn-key implementations, choosing Techgardens as your systems integrator ensures faster delivery, improved performance, accurate timelines, lower implementation costs and overall greater success for your IT projects.

Operations, Maintenance, and Monitoring

Accurate and timely data is the foundation upon which successful businesses plan for the future. Your network is no different. Instrumentation of key interfaces within the network is the key to maintaining stable operations, peak performance and maximum up time. Techgardens offers deep domain knowledge of the software required to maintain your network. We can build as much or as little capability into your network as your business requires.

Training and Support

Automated local and remote monitoring and maintenance are critical network tools but nothing replaces the deep technical knowledge Techgardens engineers bring to your on-site operations. Whether we provide 2nd tier help desk functions, 7/24/365 support or wrap-around on-site maintenance, Techgardens can provide the capabilities that augment and compliment your staff. We tailor our programs to your business requirements so your personnel can be steps ahead of the competition and keep your operations running at peak efficiency.

Techgardens – The right choice

Our experienced team of sales consultants, design architects, systems engineers, project managers and technicians offer an array of services and products focused on corporate IT requirements. At Techgardens, we are positioned for the future. Let our expertise improve your ROI with hardware, software and service offerings that deliver peace of mind and ensure success.
